

EPOS

EXCEPTIONAL POS, INC.

Introducing the New Generation of
Inventory Management Software

Your Goals

A business should work for its owner....

What are the goals for you and your company?

- Expand your business
- Achieve your financial targets
- Build equity in your company
- Spend more time enjoying the fruits of your labour

Here's How:

- Meet the need for information about your business
- Streamline your business
- Give your staff the analytical information they need to do their jobs
- Shorten the decision making process by providing critical information when you need it.
- Respond faster to time sensitive opportunities, such as taking advantage of great deals from your suppliers.
- Tighten your inventory levels and get more turns by keeping up to date with manufacturers changes in reorderable products.
- Maximize margin percentage and dollars
- Improve cash flow

Education

Get up and running fast with training and education

Our trained consultants will guide you through application of our program to the specific needs of your business, setting proven rules and procedures in daily efficiency as well as meeting your strategic targets. We explain the concepts in clear language and show you how to reap the maximum benefits of your EPOS Inventory Management System.

Proven Technology

Proven Technology Choices

The EPOS Inventory Management System incorporates the most recent proven technologies in the market, including industry standard development products such as Delphi, Crystal Reports, Microsoft Windows and SQL Database tools. These new technologies have been applied to proven retail rules and procedures, thus providing the necessary power to grow with you as your business expands.

No two businesses even in the same industry are alike. Most installations could benefit from a degree of tailoring by a team who can speak the language of business.

Software

Retail, Services, E-Commerce, Distribution, Financial Software

The EPOS Inventory Management System is the next evolution in retail and distribution software. Because the system was designed and tested by professionals with retail backgrounds, the result is a focus on simple solutions to critical retail issues.

Our e-commerce ready software is marketing-driven with extensive customer profiling.

Over-stocked inventory in specific sizes is a retailer's worst nightmare. Imagine being able to identify customers who wear those sizes and then market directly to them by phone, direct mail or e-mail.

At the heart of our system is inventory management. We address the issue of having the right inventory at the right time and help you achieve your business goals by providing the tools and guidance necessary to maximize margins, inventory turns and profit analysis.

Attached to our inventory management system are sub-systems designed help you maximize efficiencies and manage specific areas of your business such as Purchasing, Account Management and Detailed Sales Analysis.

Support

Guidance, Consulting,
Service, Understanding

Each EPOS Inventory Management System is implemented easily, rapidly and affordably, through a network of certified installers and consultants.

Because your business may run around the clock, so do our support options. We ensure you receive support from qualified and business-minded service personnel, up to seven days a week, 24 hours a day.
